Fundamentals Of Applied Statistics By Gupta And Kapoor Pdf Free Download

fundamentals of applied statistics by gupta and kapoor for free fundamentals of applied statistics by gupta and kapoor pdf and read online fundamentals of applied statistics by gupta and kapoor for download fundamentals of applied statistics by gupta and kapoor pdf for free fundamentals of applied statistics by gupta and kapoor bookQ: How to get values for the 'data' prop of an ItemRenderer in the electron dashboard this is the latest version of the electron app that I'm developing (single renderer): As you can see in the code there's a very simple `var data = JSON.parse(event.data);` dealing with the data prop. However, even if I can get at the prop, I'm not getting the same results that I'd be getting from the built-in electron renderer. The node error that I get is: `TypeError: Cannot read property 'data' of undefined at Object.Connect.emitValue`

(C:\Users\benzd\Documents\electron-blog-tour-master ode_modules\connect-sntp\index.js:219:31) A: You can use `renderer.listen` from the event object:

`event.renderer.listen(data.title, data.author);` Also, you must use `JSON.stringify/JSON.parse` if your data is an object, to convert it to a string for listening:

```
renderer.listen(data.title, data.author, function(event) {  
  event.renderer.write(""  
  + JSON.stringify(event) + "  
});
```

Finally, use proper formatting to indent your code:

```
console.log("Event", event); console.log("Title", data.title);  
  console.log("Author", data.author); console.log("Data",  
    event.data); console.log("Type", event.type);  
  console.log("Date/Time", event.date); console.log
```
