Design of buildings in the designing stage with. SAP2000 V15.0 Crack + Keygen. Tekla Software solutions for advanced building information modeling and structural.O: Getting "index.php" in URL I have a Symfony 2.6 project with a Twig/Blade front controller based configuration. I'm having an issue getting the index.php in my URL, but still using the app_dev.php with the same environment. I've setup the dev environment as this: Symfony 2.6.5 Twig 1.24.0 phpunit 3.7.8 phpunit-mock-object 0.3.2 Here is an example URL: That gets me the message: Not Found The requested URL /1 was not found on this server. What am I missing? I'm using Twig to help, but still getting the error. Thanks A: Found the issue, the application host name/path needs to be setup in the.htaccess file like so: RewriteEngine On # Force index.php/route/ to index.php RewriteCond %{REQUEST_FILENAME}!-f RewriteCond %{REQUEST_FILENAME}!-d RewriteCond %{RE
